-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6-10, 13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DE 3205205.

DE 3205205 discloses an aerator comprising all the featured elements of the instant invention, see Figures 1 and 2.

3. Claims 1-3, 6, 8-10 and 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Aghnides.

Aghnides discloses an aerator comprising all the featured elements of the instant invention, see Figures 1 and 2.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4, 5, 12, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 3205205.

DE 3205205 discloses all the featured elements of the instant invention except for the external threading of the outer ring and the aerator being screwed into the channel of the ball/spherical segment. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the outer ring with an external thread dimensioned to typical aerators and which can be screwed into the water outlet, wherein so doing would amount to the mere substitution of one functional equivalent securing means for another within the same art and the selection of any of these securing means whether a screw thread or friction fit would work equally well in the DE 3205205 device.

As to claim 14, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the aerator screwed into the ball/segment, wherein so doing would amount to the mere substitution of one functional equivalent securing means for another within the same art and the selection of any of these securing means whether a screw thread or friction fit would work equally well in the DE 3205205 device.

Allowable Subject Matter

6. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wakeman, Brandelli, Diamond and Bickle show different types of aerators with ball and socket type connections.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEVEN J. GANEY whose telephone number is (571)272-4899. The examiner can normally be reached on 9:00-5:00; Monday-Friday.
